

ON-Track® Return Belt Tracking Idler

Rely on Richwood to keep belts on the right track

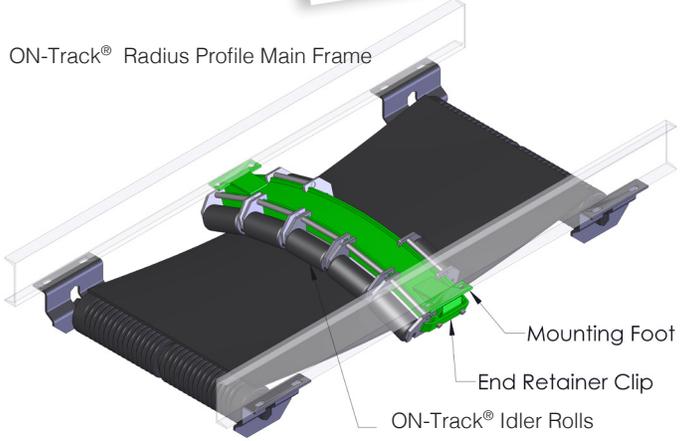

Reliable belt tracking is finally here!

Eliminate belt misalignment before it begins with consistent control. The ON-Track® works with the natural tension of the belt to evenly distribute stresses.

Instead of reacting to belt misalignment, the ON-Track® belt tracker directs and controls belt tracking, keeping the belt in its proper path.

Benefits:

- ❖ ON-center belt tracking
- ❖ No edge guide rollers
- ❖ Prevent damage to the belt and conveyor structure caused by off-center belt tracking
- ❖ True arc radius profile to guide the belt without overstress to belting or rollers
- ❖ Heavy duty T-frame mounted multi-roll design for ease of installation and change out
- ❖ Designed for optimum work life with heavy duty components. Made in USA.
