

Model FRP- Front Runner™ Precleaner

The Model FRP Precleaner is a heavy-duty unit designed for precleaning of carryback material at the conveyor discharge pulley.

Front Runner™, the foremost in Precleaner design, provides exceptional cleaning performance in the most compact and durable system available.

A specially formulated rubber blade media enhances blade life over urethane and reduces wear on belts and splices.

The Front Runner™ main frame is double reinforced. All key components are stainless steel for corrosion resistance.

Each unit furnished complete with mounting flanges, reinforced rubber scalping blade and compact ratcheting tensioners. Cleaners are available for belt widths from 18" to 96".

- *Complete Precleaner system for universal installation selected by belt width.*
- *Compact design for ease of fit in all applications*
- *R2000 Rubber cleaner blade to fit all belt widths*
- *Heavy-duty main frame for superior service life*
- *Suitable for use on reversing conveyors*
