

Schedule a Richwood On-Site Inspection for *Improved Conveyor Efficiency*

To meet efficiency and productivity goals, busy material handling applications around the world rely on Richwood.

What can a conveyor efficiency inspection do for you?

Our trained staff will provide a focused, experienced evaluation. The conveyor efficiency survey will cover material flow, belt cleanliness, belt misalignment and other factors that may lead to unscheduled downtimes.

Once completed, a detailed report is submitted to you. Additionally, recommendations based on our global experience and CEMA standards will be submitted that outline a complete, comprehensive solution.

Our engineered solutions:

- ***Convert problem load zones into worry free zones***
- ***Eliminate carryback on conveyors***
- ***Keep conveyor belts aligned and on track***
- ***Protect chutes from wear and impact***
- ***Reduce noise pollution***
- ***Provide long-term cost savings***

Let Richwood help keep your conveyors running efficiently. We are committed to providing real solutions that help you meet your productivity goals. Our proven solutions and expert advice provide real ROI with Richwood On-Site Inspections.

Call to schedule your Richwood On-Site Inspection for Improved Conveyor Efficiency today and experience for yourself "Proven Solutions. Expert Advice." **(304) 525-5436**

***Innovative conveyor solutions
for bulk material handling.***
