

# SideKick™

## *Diagonal Plow*

The SideKick™ Diagonal Plow can be used on any conveyor to prevent material spillage on the inside return belt from becoming trapped between the belt and the conveyor.

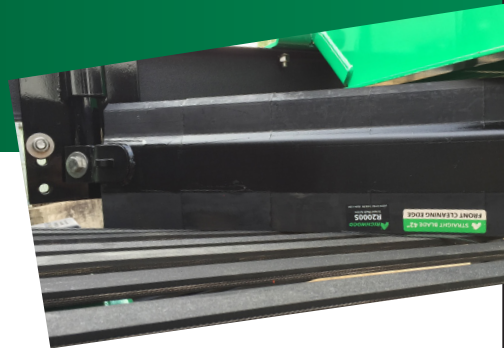

Richwood's SideKick™ Diagonal Plow is self adjusting to ensure consistent contact with the inside cover of the return conveyor belt.

The specially formulated R2000-60 rubber blade media provides best performance and wear life.

Universal bolt-on mounting plates will fit any standard conveyor structure.

Call today for assistance with your application.

Made in USA. Rely on Richwood!
